DANISH SUPPORT FOR UKRAINE

Pursuant to resounding worldwide condemnation of Russia's illegal invasion of Ukraine and together with our partners and allies in the EU and NATO, Denmark strongly condemns Russia's brutal and unjustifiable military aggression against Ukraine. It constitutes a gross violation of international law, brings immense suffering to the people of Ukraine and is an attack on the international rule-based order and our democratic values. Denmark fully supports the territorial integrity and sovereignty of Ukraine within its internationally recognised borders.

Denmark fully supports and works to maintain the broad, cross-regional alliance in defence of Ukraine's sovereignty as stipulated in the Uniting for Peace resolution. Denmark has launched outreach internationally in order to build and maintain a broad and united approach towards Russia's unlawful invasion of Ukraine. Russia's aggression in Ukraine is not only a matter for Europe, but for the world. The war exacerbates existing global challenges. A long-term defender of multilateral cooperation, Denmark will continue to defend the UN Charter, strengthen the multilateral system and mitigate derived consequences of the war in Ukraine.

Together with our partners and friends in the EU we have adopted massive and unprecedented sanctions against Russia. The EU has decided to open accession negotiations with Ukraine and has made available around EUR 214.5 bil. to Ukraine since the Russian invasion. Denmark has contributed to this amount, although the contribution to the combined EU-support to Ukraine has not been included in this overview of Danish support.

Denmark shows solidarity with Ukraine through multifaceted and long-term support provided bilaterally and in concert with our partners and allies. Since the outbreak of the war, Danish support to Ukraine amounts to approx. EUR 11.2 bil. in military support and approx. EUR 1.2 bil. in civilian contributions. Of the civilian support, approx. EUR 860 mil. has been granted, and approx. EUR 300 mil. has been committed to guarantees and guarantee schemes.

DANISH SUPPORT TO UKRAINE SINCE THE RUSSIAN FULL-SCALE INVASION IN 2022

DENMARK'S SECURITY COMMITMENT TO UKRAINE

Denmark has entered a 10-year security commitment with Ukraine. The security commitment describes the strategic frame for Denmark's long-term support for Ukraine's defense against the Russian war of aggression, and consists of a military core complemented by broader civilian support elements, including among others military support, support for the Ukrainian defense industry, reconstruction efforts, reforms and support to the private sector.

MILITARY SUPPORT

Denmark is strongly committed to supporting Ukraine's ability to defend itself against Russian military aggression. Measured per capita and in absolute terms, this places Denmark among the very top contributors of military support to Ukraine. Denmark has provided substantial lethal and non-lethal military support to Ukraine in terms of weapons, equipment and other military assistance, including training, which is making a real difference for Ukraine's ability to defend itself on the battlefield. Denmark is continuously looking at ways to further increase our assistance in order to meet evolving Ukrainian military requirements.

HUMANITARIAN AND ACUTE SUPPORT

Since the beginning of the war, Denmark has contributed more than 1.3 billion DKK in humanitarian and acute support for Ukraine and neighbouring countries. The humanitarian support has been provided through the UN system, the EU Civil Protection Mechanism, International Red Cross, and Danish Civil Society actors and their Ukrainian partners. The Danish contributions are directed where the humanitarian needs are highest and focuses on hard-to-reach areas as well as vulnerable groups. Specific focus is put on delivery of acute- and basic humanitarian aid, including in response to attacks on civilian infrastructure as well as protection of civilians, mental health and psychosocial support (MHPSS), humanitarian mine action, education, winterization efforts, and protection of vulnerable groups, including women, children, refugees and internally displaced people.

RECONSTRUCTION

Shortly after the full-scale invasion, the Danish Prime Minister Mette Frederiksen and Ukrainian President Zelensky agreed that Denmark will take on a special role in the reconstruction of the city and region of Mykolaiv. Denmark has supported acute reconstruction with a focus on accommodating critical needs in the energy sector, including the procurement of generators, water pipes, and heating appliances. The reconstruction support has a special focus on social infrastructure, water, heating, energy supply, strengthening of civil society and donation of rescue equipment. Danish support is also contributing to economic recovery though labour market initiatives such as vocational education and training. In 2025, Denmark launched its largest country programme: the Ukraine Transition Programme (UTP), with a budget of DKK 2.8 billion, covering the time period July 2025 – June 2028. You can read more about the UTP here.

REFORM EFFORTS

Since the Russian invasion, Denmark has supported several projects in Ukraine focusing on the continued development of democracy and human rights, sustainable growth, green transition, and increased energy independence. Denmark is implementing and co-funding the EU Anti-Corruption Initiative (EUACI) in Ukraine, focusing in particular on promoting integrity, transparency and accountability of the reconstruction aid. Mykolaiv has become an Integrity City of the EUACI with the aim to develop best practices in this field. Denmark's support to reforms and democracy after the full-scale invasion builds on Denmark's longer-term engagement in Ukraine, and were previously implemented under the Danish Eastern Neighbourhood Programme. Since 2025, reforms efforts are implemented along with the reconstruction effort under the country programme Ukraine Transition Programme.

PEACE AND STABILISATION EFFORTS, INCLUDING ACCOUNTABILITY EFFORTS

Denmark initiated the Group of Friends for Accountability following the Aggression against Ukraine in March 2022. Denmark was among 43 states referring the situation in Ukraine to the International Criminal Court and has supported the Court financially. Danish national authorities have established procedures to collect evidence from Ukrainian victims who have fled to Denmark. Through the Peace and Stabilisation Fund in Ukraine, Denmark supports increased stabilisation, social cohesion, nuclear, cyber and general security, justice, reintegration of veterans, appropriate handling of victims and evidence, and state legitimacy in Ukraine. Denmark contributes with secondment of civilian advisors through the EU Advisory Mission in Ukraine to assist with stabilisation and crisis management in the country.

FINANCIAL SUPPORT

Denmark has supported the state of Ukraine with a grant of EUR 20 mil. through the World Bank to support critical government functions and public social service expenditures including salaries for teachers, health care workers and pensions. Additional financial support has been provided as a guarantee including subsidies of approx. EUR 40 mil. through the World Bank to Ukraine. The guarantee covers a loan of EUR 30 mil. to Ukraine for social payments, healthcare services and pensions as well. At the end of 2023, Denmark supported the International Development Association (IDA), which is part of the World Bank with approx. EUR 7.6 million to address the social and economic consequences of the Russian intervention in Ukraine.

PRIVATE SECTOR SUPPORT

To mobilize private sector financing in Ukraine the Danish government has allocated funds to reduce risks of investments and trade with Ukrainian partners. Impact Fund Denmark (IFDK) has in total been allocated approx. 53 million EUR to facilitate private sector investments in Ukraine. In 2026, an additional approx. EUR 20 million was allocated amounting the total framework for the Ukraine Facility amounts to approximately EUR 75 million for the period 2025-2028. Commitments of up to EUR 20 million per year are expected through 2028. Likewise, the government has allocated a total of approx. 134 million EUR to facilitate a state-funded loan and guarantee scheme under Denmark's Export and Investment Fund (EIFO). This facilitates a state-funded loan and guarantee scheme of approx. 381 million EUR. The funds are allocated to de-risking trade and investments with both private Ukrainian buyers as well as public Ukrainian buyers. In addition, the government has allocated approx. 115 million EUR under the Ukraine Fund to facilitate a state guarantee of approx. 382 million EUR for a wind project. Finally, the new and updated business instruments can support projects in Ukraine.

HEALTH DONATIONS

Denmark allocated approx. EUR 12.8 mil. for health related donations in 2022, out of which approx. EUR 8.1 mil. was spent on donations of medical supplies, including medical devices, medicines and personal protective equipment and approx. EUR 4.7 mil. allocated to the WHO's emergency appeal for Ukraine. The donations include medicine, vaccines, medical devices, and personal protective equipment and are coordinated with the EU Emergency Response Coordination Centre and relevant ministries and authorities. Additionally, Denmark has provided medical care to 293 Ukrainian patients within the Danish healthcare system.
