

Natalia Zofia Ściegosz – Commercial Advisor, Energy

Organisation: Ministry of Foreign Affairs, Royal Danish Embassy in Warsaw

Education:

Natalia holds a master and an engineer's degree in Agriculture with a specialization in Agroecology and Renewable Energy from the Warsaw University of Life Sciences, a postgraduate diploma in Offshore Wind Energy from Gdańsk University of Technology, and Master Business Administration (MBA) in Energy from Łazarski University in Warsaw.

Experience:

Natalia has over 11 years of experience in the energy sector, with a strong focus on renewable energy and offshore wind projects. With more than 9 years of experience in the Polish civil service, she specialized in energy, renewables, climate, and environmental sectors, including offshore wind (OWF), renewable energy sources (RES), and sustainable development. Additionally, she has 2 years of corporate experience working with early-stage OWF developers, concentrating on regulations, permitting, and supply chain management. Her commitment to advancing renewable energy is a core aspect of her professional identity. For instance, she actively contributed to the creation, submission, signing, and implementation of the Polish Offshore Wind Sector Deal. Thanks to her broad experience, she has a strong understanding of EU regulations, support schemes, the political landscape, and legislative changes.

In January 2025, she joined Embassy of Denmark in Warsaw as a Commercial Advisor for the Trade Council, specializing in the energy sector. Her primary focus areas are renewable energy, particularly offshore wind, with additional responsibilities in biogas and biomethane.
